

School & University Entrance Support

Providing students with expert Schools, University, Higher Education and Careers, advice and support.

Students and parents for all education entry points will have a detailed initial consultation and students will be given an 'early needs analysis' assessment, to guide their bespoke programme. Such a detailed approach will ensure that each student is personally guided by an assigned mentor who has the relevant expertise and experience to support them at every stage of their chosen educational pathway.

We have supported students to gain entry into many of the UK leading Independent Schools (many receiving Scholarship awards) and some of the World's leading Universities.

Benefits include:

- A track record of success, achieved through a highly personalised service of UK School & University entrance support
- Expert *Spires Online* mentors who have a thorough understanding of specific entrance requirements of the Schools and University network
- A bespoke 'Oxbridge Programme' that supports students through the complex and challenging process of applying to the Universities of Oxford and Cambridge.
- The ability to overcome the challenges of time and space by working across time zones and International boundaries

School & University Entrance Support
